ABDUL ASIF

SENIOR ENGINEERING LEAD | FRONTEND/REACT ENGINEER | GENERATIVE & AGENTIC AI

Bengaluru, India | 9743781587 | arasif4@gmail.com

PROFESSIONAL SUMMARY

Senior Engineering Lead with 10+ years of experience building enterprise web applications, reusable design systems, data-intensive dashboards, and complex onboarding workflows. Deep expertise in React, JavaScript, TypeScript, Redux, Node.js, REST APIs, data visualisation, testing, and CI/CD. Recently expanded into Generative AI and Agentic AI engineering through a hands-on support-assistant POC covering prompt engineering, Retrieval-Augmented Generation (RAG), grounded answers with citations, custom agent orchestration, tool calling, Model Context Protocol (MCP), local document retrieval, and mock LLM integration. Experienced with GitHub Copilot and Cursor AI for AI-assisted coding, refactoring, debugging, test generation, and documentation.

CORE TECHNICAL SKILLS

Frontend	React 19, JavaScript (ES6+), TypeScript, JSX, HTML5, CSS3, responsive UI, accessibility, reusable component architecture
React Ecosystem	Redux, Redux Toolkit, React Query, Context API, MUI, Tailwind CSS, PrimeReact, Next.js, Vite
Generative AI	Large Language Models (LLMs), prompt engineering, system prompts, context engineering, structured outputs, hallucination mitigation, grounding, citations
RAG & Retrieval	RAG architecture, document ingestion, chunking, embeddings concepts, semantic retrieval, local document search, vector database concepts, source attribution
Agentic AI	AI agents, agentic workflows, planner-executor pattern, tool/function calling, agent loop, memory concepts, human-in-the-loop (HITL), Agentic Process Automation (APA)
AI Integration	Model Context Protocol (MCP), MCP client/server architecture, tool registry concepts, REST-based tools, local/mock LLM provider integration
Testing & DevOps	Jest, React Testing Library, unit testing, Git, GitHub, GitLab CI/CD, Jenkins, code reviews, Agile delivery
Data & Cloud	Highcharts, D3.js, Tableau, MongoDB, Cosmos DB, MySQL, SQL, Azure, microservices

RECENT AI PROOF OF CONCEPT

Agentic AI Support Assistant POC | React + Vite + TypeScript, Node.js, Express.js

- Built an end-to-end support assistant with a React frontend and Node.js backend, using a modular architecture for chat, retrieval, agent orchestration, and tool integration.
- Implemented a RAG workflow over local documents to retrieve relevant context and generate grounded responses with source citations.
- Created custom agent logic for intent handling, multi-step decision flow, tool selection, and response generation, including a local mock LLM provider for development without an external API key.
- Designed MCP-style client/server integration to expose tools through a consistent contract and demonstrate how an agent can discover and invoke capabilities.
- Added safeguards and reliability concepts covering hallucination reduction, prompt constraints, error handling, traceable sources, and evaluation-ready test scenarios.

PROFESSIONAL EXPERIENCE

Persistent Systems Ltd | Senior Engineering Lead | 03-2023 - Present

- Develop frontend features for enterprise cybersecurity and application-onboarding platforms using React, Redux, MUI, Tailwind CSS, and PrimeReact.
- Build data-intensive workflows including Event Explorer, threat-intelligence configuration, dynamic filters, and complex onboarding user journeys.
- Maintain and enhance 90+ reusable UI components, improving performance, routing behaviour, dark-theme support, and usability.
- Apply TypeScript, modern React patterns, API integration, and state/data-management approaches to deliver scalable enterprise applications.
- Use GitHub Copilot and Cursor AI for code generation, refactoring, debugging, unit tests, documentation, and faster engineering workflows.
- Contribute through code reviews, mentoring, stakeholder collaboration, and improved unit-test coverage with Jest and React Testing Library.

Philips | Lead Engineer - Front End Developer | 08-2018 - 03-2023

- Developed frontend applications and data visualisations using React, JavaScript, MERN technologies, and reusable component patterns.
- Owned design, development, and maintenance of metrics, reports, analytics dashboards, and interactive visualisations supporting business decisions.
- Worked with stakeholders to translate requirements into business-intelligence dashboards and widgets across structured and unstructured datasets.
- Introduced automated server monitoring with email notifications and contributed to microservices for controlled dashboard access.

Meteonic Innovation Ltd | UI Front End Developer | 04-2017 - 01-2018

- Developed fact-based insight dashboards from large datasets and log data using HTML5, CSS, JavaScript, jQuery, and content-management systems.
- Performed unit testing and data validation and presented research findings to project leadership.

Frontal Rain Technologies | Software Developer | 07-2015 - 02-2017

- Developed applications to process JSON and XML for RESTful web services using JavaScript and Node.js.
- Built frontend pages with HTML5, CSS3, and JavaScript, resolved browser-compatibility issues, and collaborated with customers on scope and timelines.

Manipal Global - Project Apollo | Software Engineer | 09-2014 - 07-2015

- Developed an online examination and assessment tool for corporate, PSU, and education sectors.
- Translated business requirements into application rules and question-pattern modules and implemented CSV/Excel answer-key processing.

CreativeYogi Pvt Ltd | Software Engineer | 07-2012 - 07-2014

- Performed UI and service testing, documentation, defect identification, website mock-ups, backend development, and MySQL queries.
- Progressed from UI Intern to Junior UI Developer within four months.

EDUCATION

- Master of Computer Application (MCA), Computer Science - Annamalai University
- Bachelor of Science (B.Sc.), Computer Science & Statistics - Kannur University

CERTIFICATIONS & CONTINUOUS LEARNING

- Cursor AI training and certification; GitHub Copilot and AI Fluency learning applied to daily engineering workflows.
- Tableau 10 A-Z Hands-On for Data Science; Full Stack Data Science - Jigsaw Academy; Post Graduate Diploma in Life Skills Development.
- Current focus: Generative AI, RAG, Agentic AI, MCP, LLM evaluation, Responsible AI, and production-oriented AI application architecture.
